

## AIR COILS

the diameter of the winding wire [mm]		the inner diameter of the coil [mm]		number of turns		the length of the coil [mm]	
min	max	min	max	min	max	min	max
0,25	1,8	0,7	10	1	dowolna	0,5	30

### Technical data:

Winding wires	- enamelled copper winding wires CuL i CuLL - silvered copper winding wires CuAg - copper winding wires be thermally - special winding wires
Pin shape	- radial - axial - special
Pin	- isolated pin - non isolation - tin
Winding direction	- right - left
Tinning materials	- Pb free - Pb (Customer on request )
Air coils	-single layer - multiple layer - surface mount air coils with an adhesion point for transport assemblies and automated assembly machines - mounting hole (THT)
Application	- consumer electronics - telecommunication - automotive
